

Assistant Low Carbon Consultant Based at our Leicester Office

FOCUS CONSULTANTS 2010 LLP is a leading multi-disciplinary consultancy specialising in construction and property services, project management, regeneration and economic development with offices in Nottingham, Leicester, London and Lincolnshire. We specialise in providing the following services:

- Project and Programme Management
- Building Surveying
- Quantity Surveying
- Funding Research and Evaluation
- Energy Carbon Sustainability.

The Energy Carbon Sustainability Team within Focus continues to grow at a significant pace. As well as providing a menu of services to a growing portfolio of new and repeat Clients, the team provides essential in-house support to other elements of the business.

The Role

We are currently seeking to recruit an Assistant Low Carbon Consultant – Energy Assessor to join the Focus Energy Carbon Sustainability team. The successful person will be primarily responsible for providing Non-Domestic Energy Assessor services. In addition they will be expected to provide considered low carbon evaluation advice to clients across a range of sectors. This will include assessment of renewable technologies and appraisal of low carbon measures to new and existing buildings within the appropriate energy modelling software. Demonstrable report writing skills will be required.

Holding a Non-Domestic Energy Assessors qualification to level 4 would be advantageous, with experience of IES software, however Focus can offer the necessary training and support to the right candidate. To support the wider services across the department the successful candidate will be trained in SAP Software and will have the opportunity to develop their understanding of BREEAM and Code for Sustainable Homes.

As a discipline that continues to grow, the above post represents an exceptional opportunity for the right person to develop their skills within the field of low carbon advice, supported by their existing knowledge and understanding of construction.

Significant career opportunities exist within the Focus Energy Carbon Sustainability Team and across the wider business. Focus has a first class track record in successfully supporting individuals through the RICS APC process and we will actively encourage and support the same or similar for the successful individual.

You

Enthusiastic and ambitious, good interpersonal skills, keen to learn and be challenged, genuine customer focus. A Graduate in one of the construction disciplines such as Building Surveying, Quantity Surveying, Architecture, Project/Construction Management, Building Services, Sustainability. Other relevant qualifications will also be considered.

What We Offer

- A different approach and a varied workload
- Stimulating non-traditional environment
- Opportunities to work across the various discipline boundaries within the Focus organisation
- Structured career path
- Envidable record in successfully mentoring candidates through the APC process
- Commitment to support candidate to further study
- Competitive salary package commensurate with age and experience.
